L3: Entry 1 of 1

File: USPT

Jul 25, 2000

DOCUMENT-IDENTIFIER: US 6094216 A

**** See image for Certificate of Correction ****

TITLE: Stereoscopic image display method, and stereoscopic image display apparatus using the method

US Patent No. (1):
6094216Detailed Description Text (26):

Subsequently, the scan operation is started in turn from the first scan line, and in this case, the display 1 displays, as the stripe image 11, the corresponding portion of the second stripe image 11.sub.B obtained by arranging the stripe images L, R, L, R, L, R, . . . (the stripe pixels will be simply abbreviated as above although they are, strictly speaking, L.sub.1, R.sub.2, L.sub.3, R.sub.4, L.sub.5, R.sub.6, . . .) in the opposite order. At the same time, the spatial light modulation element 2 alternately forms and displays the light-transmission portions and the light-shielding portions in the opposite order of open, close, open, close, open, close, . . . as the second parallax barrier pattern 2. When the image displayed on the display 1 is observed via the spatial light modulation element 2, the second stripe image 11.sub.B can be observed as a stereoscopic image.
